LIFTING & ANTIAGING CONCENTRATE

P-264

LIFT FILL

Concentrate of functional actives for a strong biorevitalizing action, anti-aging and lifting.

The innovative pentapeptide-18 combination works in synergy with Argirelin to prevent signs of aging and reduce wrinkle depth. Gamma Aminobutyric Acid produces a botox-like effect for an immediate lifting result. The combination of molecular weights Hyaluronic Acid performs targeted “multilayer” action penetrating at three different depths with a biorevitalizing, moisturizing, elasticizing and plumping effect. Glutathione, known for its antioxidant and detoxifying properties, enriches the formula.

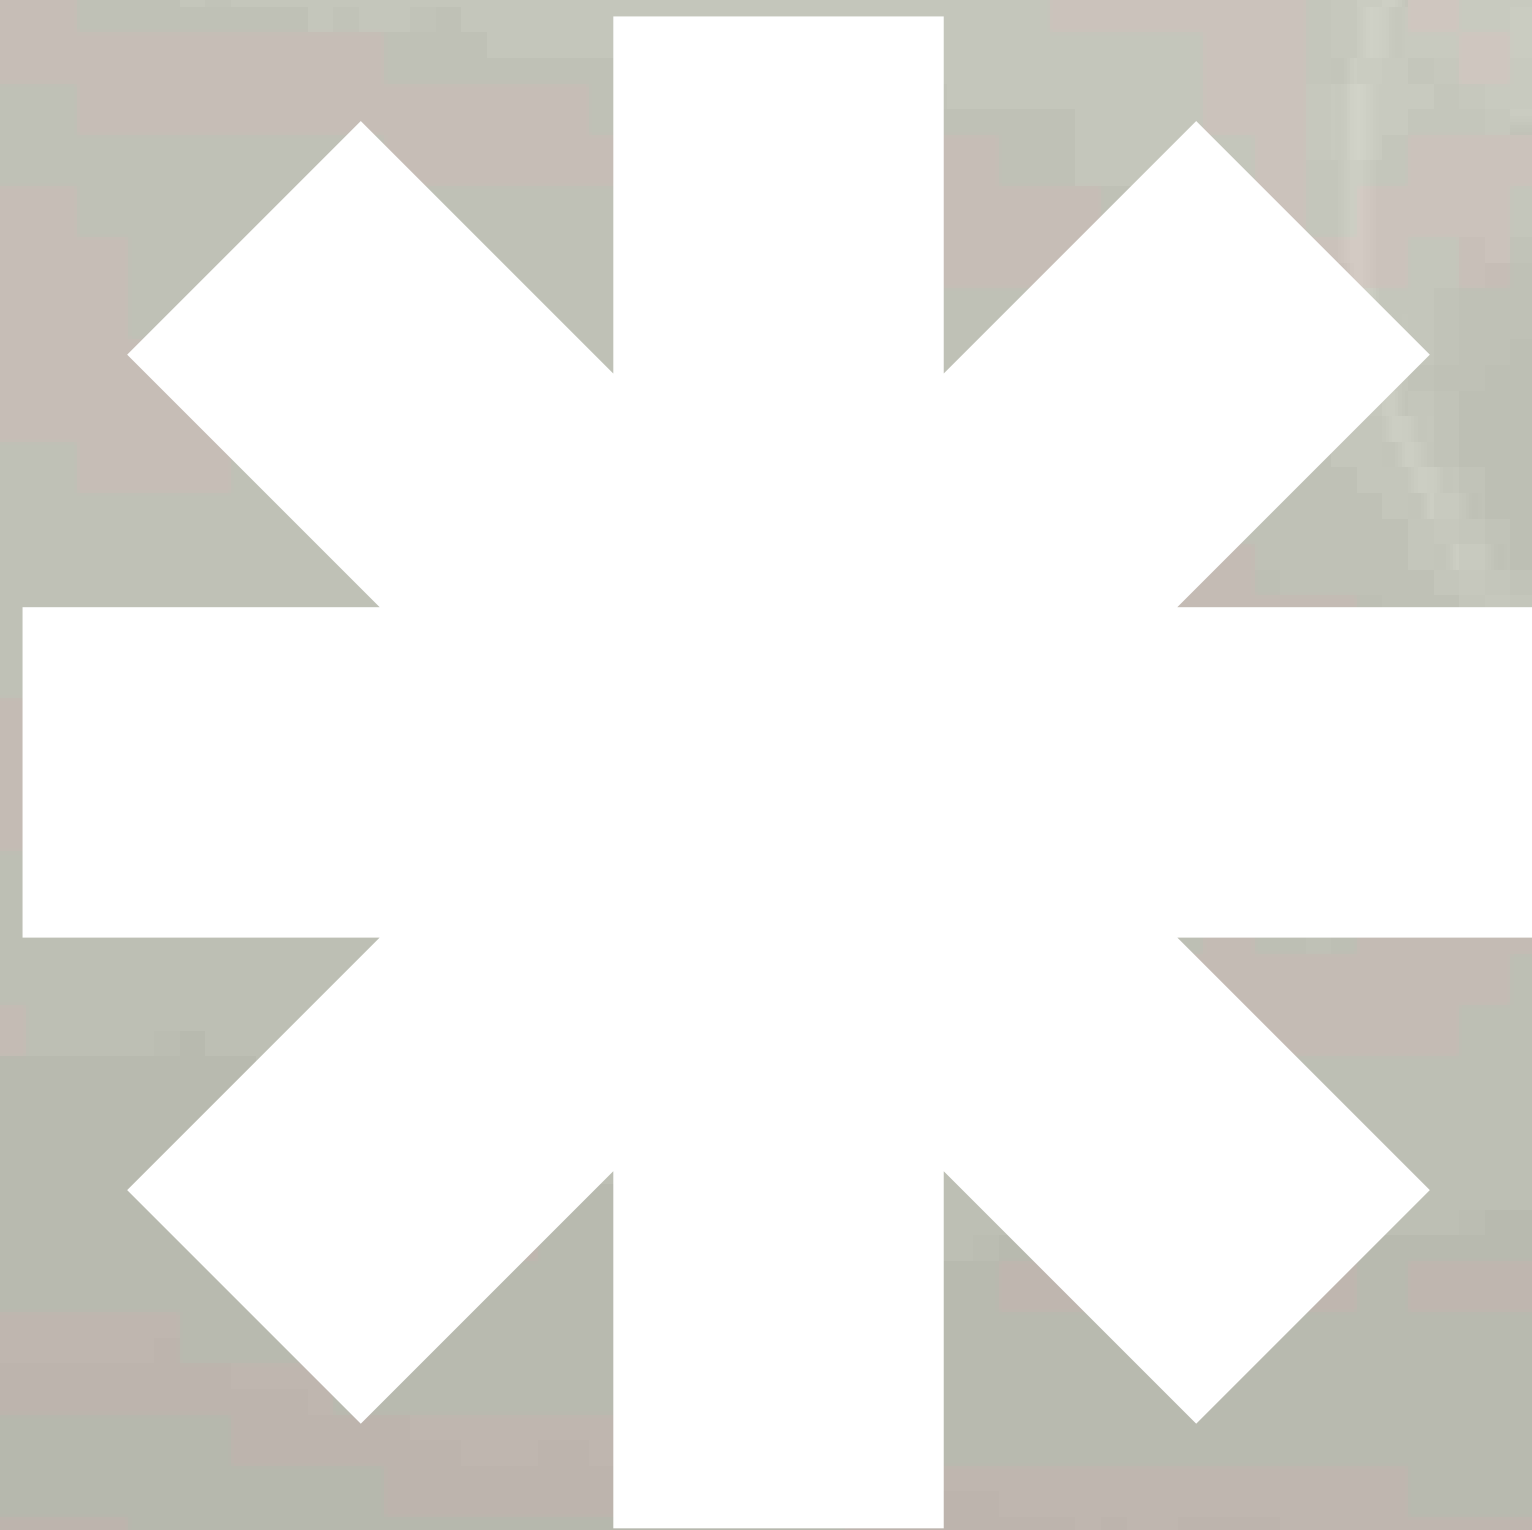

MOISTURIZING & SOOTHING CONCENTRATE

U-552

JALU FILL

Concentrate of functional actives for a deep hydration of tissues along with a soothing action.

This formulation combines Hyaluronic Acid of different molecular weights: hyaluronic acid at a high molecular weight forms a biofilm over the outermost layers of the skin, and it is able to contain water molecules for an immediate hydrating effect; at a medium molecular weight, it penetrates at a deeper level and plumps the tissues; at a low molecular weight, it reaches the deepest layers of the skin, stimulating the growth of fibroblasts and the natural production of endogenous hyaluronic acid.

SPOT MINIMIZING & WHITENING CONCENTRATE

R-429

WHITE FILL

Concentrate of functional actives for a whitening and preventive action for the development of skin dyschromia.

The combination of Tranexamic Acid and Arbutin acts on the process of melanogenesis, that is the synthesis and accumulation of melanin by melanocytes, and guarantees an effective depigmenting action, which uniformes the skintone and makes the skin look brighter.

A natural photoprotective active completes this formula and prevents the development of new spots.

E-653

BODY DROP

Concentrate of functional actives to counter localized adiposity and blemishes caused by cellulite.

A synergy of active ingredients: Phosphatidylcholine induces lipolysis, Carnitine and Sodium Deoxycholate promote the disposal of the lipids in excess. Caffeine enhances the result, it is an activator of the microcirculation, which has a draining action.

The use of the product, in combination with specific technologies for body remodeling, enhances the beauty of a harmonious silhouette.
